

Hello!

I was thrilled to see your job posting for the Customer Success Enablement Specialist position and I'd love to throw my hat in the ring.

For the past 7 years across my roles in sales and customer support, I've combined analytical thinking with a genuine commitment to helping professionals succeed. I'm particularly delighted in the opportunity to develop and maintain a library of resources and support internal communication.

I don't normally get this personal with cover letters (that's if I even write one if we're being honest) - but my wife and I have been Carrot members and in October of 2021, we welcomed our little Carrot baby into the world through IVF. I'd absolutely love to be a part of a team that helps make this happen for others.

I am available at your convenience and I hope to chat soon.

Thank you so much for considering me!

Sincerely,
Tyler Cave
